About us

WHO WE ARE?

STUBA Green Team is the only Formula Student team in Slovakia, which successfully represents our country and university at the Formula Student Electric competition. Our team was founded in 2009 and currently consists of 16 active members, students of the Slovak university of Technology. Every year

we participate in competitions across the Europe, where we compete against other student teams from all over the world. We have been able to develop and build 8 electric monoposts so far and at the moment we are working on a brand new monopost for this season.

OFFER OF COOPERATION

We offer an opportunity to work with a team of young technicians, who are highly motivated and want to achieve extraordinary things. For employers, we offer close contact with perspective graduates who are able to work on development without technical assistance from universities.

We offer the opportunity to support a project that allows students to:

- improve technical and soft skills
- work on a real project where the budget and deadlines need to be respected
- develop themselves in innovative technologies as well as economic managerial skills
- gain knowledge from practice

A matter of course for each partner is the promotion of cooperation and presentation of the partner, as well as an invitation to STUBA Green Team events.

TERMS, INFORMATION, NOTES

The location and size of the logo is approximate and illustrative, further adjusted according to the overall design of the monopost, if you are interested in cooperation, consultation is possible before closing the design.

These amounts, requirements and consequently, what we are able to offer to serve for the idea and indicative categorisation, which ultimately depends on mutual agreement.
